

**SUBSPECIALTY TRACK: ULTRASOUND IN THE NEW MILLENNIUM**

The focus of this course is to provide instruction in the routine and unique applications of ultrasound in the cancer patient. Presentations, both didactic and practical workshops, will cover a range of organ systems involving a variety of cancers with their respective diagnoses, management, complications and outcomes. Physicians and sonographers will also have an opportunity to participate in hands-on demonstrations or state-of-the-art ultrasound equipment, as well as to interact directly with the faculty. This course should be of interest to physicians (radiologists, oncologists, and surgeons), radiology residents, fellows, and medical sonographers.

**Friday, 4/6/18**
